

VERIFICATION AND CALIBRATION OF EQUIPMENT

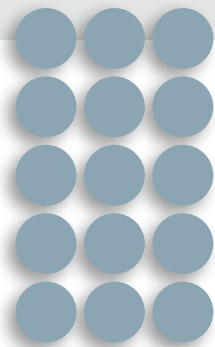

Electrical Equipment

Electronic Equipment

On-site or in our Laboratory, our specialized technicians perform calibrations and verifications of a wide range of electrical and electronic equipment, also for measurement at frequencies > 10 KHz.

- R&D Test Benches
- Manufacturing Test Benches
- Manufacturing Lines
- Testing Laboratories

ACCREDIA - LAT 103
ISO 9001 - ISO 17025

NATIONAL INSTRUMENTS OFFICIAL PARTNER

 **TESEO**
CLEMESSY

CALIBRATED EQUIPMENT

- Oscillators and frequency counters
- Oscilloscopes
- RF power generators
- RF power sensors
- RF power meters
- Electromagnetic field meters and antennas
- Low frequency meters and generators (< 10 KHz)
- Test equipments for electrical safety
- Spectrum analyzers
- Receivers and emitters for EMC tests, EMI included (Electromagnetic Immunity)
- High voltage pulses and fast transients generators

OUR SERVICES

- Booking of the calibration in order to reduce the turn-around time
- Fast Calibrations (24H) on demand
- Auto-recall: we will remind you the expiry calibration date of your equipment when in our database
- Yearly and multi-yearly framework contracts: optimization of our relative administrative costs
- Maintenance and repair quotations
- Consultancy about the metrological confirmation of your equipment
- Professional training on measurement methods and uncertainty of measurement evaluation
